No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1985 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 243

NUMBER 1, NOVEMBER 15, 1985

COMMUNICATIONS

- Escherichia coli* Integration Host Factor Inhibits the NusA Stimulation of RNA Polymerase Sigma Subunit Synthesis *in Vitro*
Susan Peacock and Herbert Weissbach 315
- α -Fetoprotein Gene DNA-Binding Proteins
Gilbert J. Cote, Zhi Wang, and Jen-Fu Chiu 320

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

- Mitochondrial Nicotinamide Nucleotide Transhydrogenase: Inhibition by Ethoxyformic Anhydride, Dansyl Chloride, and Pyridoxal Phosphate
Mutsuo Yamaguchi and Youssef Hatefi 20
- Ruthenium Red-Insensitive Ca^{2+} Uptake and Release by Mitochondria
Ronald S. Cockrell 70
- Reactions of Nitrogen Dioxide in Aqueous Model Systems: Oxidation of Tyrosine Units in Peptides and Proteins
Walter A. Prütz, Hans Mönig, John Butler, and Edward J. Land 125
- Isolation and Properties of the Soluble *c*-Type Cytochromes of the Dinoflagellate *Peridinium Cinctum*
Ayala Hochman, Thomas Berman, Batya Plotkin, and Abel Schejter 161
- Vanadate Enhancement of the Oxidation of NADH by O_2^- : Effects of Phosphate and Chelating Agents
Douglas Darr and Irwin Fridovich 220
- Regulation of Respiration by Na^+ and K^+ in the Halotolerant Bacterium, Ba_1
Shifra Ken-Dror and Yoram Avi-Dor 238
- Mitochondrial Nicotinamide Nucleotide Transhydrogenase: Nonidentical Modification by *N,N'*-Dicyclohexylcarbodiimide and *N*-(Ethoxycarbonyl)-2-ethoxy-1,2-dihydroquinoline at the NAD(H) Binding Site
Donna C. Phelps and Youssef Hatefi 298
- Purification and Characterization of an Iron-Containing Superoxide Dismutase from a Eucaryote, *Ginkgo biloba*
Mary V. Duke and Marvin L. Salin 305

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

- The Synthesis of Mannose 1-Phosphate in Brain
Sujit K. Guha and Zelda B. Rose 168
- Apparent Multiple Catalytic Sites Involved in the Ester Hydrolysis of Juvenile Hormones by the Hemolymph and by an Affinity-Purified Esterase from *Manduca sexta* Johannson (Lepidoptera: Sphingidae)
Yehia A. I. Abdel-Aal and Bruce D. Hammock 206

GLYCOPROTEINS AND GLYCOLIPIDS

- Comparison of *N*-Acyl Phosphatidylethanolamines with Different *N*-Acyl Groups as Activators of Glucocerebrosidase in Various Forms of Gaucher's Disease
Alakananda Basu, Elizabeth Prence, Kevin Garrett, Robert H. Glew, and John S. Ellingson 28

1,4-Dideoxy-1,4-imino-D-mannitol Inhibits Glycoprotein Processing and Mannosidase	<i>Grazyna Palamarczyk, Mike Mitchell, Paul W. Smith, George W. J. Fleet, and Alan D. Elbein</i>	35
Arylphorin from <i>Manduca sexta</i> : Carbohydrate Structure and Immunological Studies	<i>Robert O. Ryan, Darrell R. Anderson, William J. Grimes, and John H. Law</i>	115

MEMBRANES, CELL SURFACES, AND RECEPTORS

The Orientation of Phosphate-Dependent Glutaminase on the Inner Membrane of Rat Renal Mitochondria	<i>Richard A. Shapiro, Wayne G. Haser, and Norman P. Curthoys</i>	1
The Insertion of D- β -Hydroxybutyrate Apodehydrogenase into Phospholipid Monolayers and Phospholipid Vesicles	<i>Jean-Marc Berrez, Franc Pattus, and Norbert Latruffe</i>	62
The Effect of Chelating Agents on the Elemental Composition of Sarcoplasmic Reticulum: The Reactivity of SH Groups with N-(1-pyrene)maleimide	<i>Sandor Papp, Michael Rutzke, and Anthony Martonosi</i>	254

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

Influence of a Fibrin Acid Type of Hypolipidemic Agent on the Oxidative Metabolism of Arachidonic Acid by Liver Microsomal Cytochrome P-450	<i>J. Capdevila, Y. R. Kim, C. Martin-Wixtrom, J. R. Falck, S. Manna, and R. W. Estabrook</i>	8
ω -1 and ω -2 Hydroxylation of Prostaglandins by Rabbit Hepatic Microsomal Cytochrome P-450 Isozyme 6	<i>Karsten A. Holm, Dennis R. Koop, Minor J. Coon, Anthony D. Theoharides, and David Kupfer</i>	135
Microheterogeneity of a Male-Specific Rat Hepatic Cytochrome P-450: Existence of Three Allozymic Forms	<i>Arfaan Rampersaud, David J. Waxman, Dene E. Ryan, Wayne Levin, and Frederick G. Walz, Jr.</i>	174

PHYSICAL BIOCHEMISTRY

The Thermotropic Properties of Human Plasma Fibronectin	<i>Paulina Franceschi de Carreira and Francis J. Castellino</i>	284
---	---	-----

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

Characterization of the Subunits of β -Conglycinin	<i>J. B. Coates, J. S. Medeiros, V. H. Thanh, and N. C. Nielsen</i>	184
--	---	-----

PROTEIN STRUCTURE AND FUNCTION

Canine Hepatic Lysosomal Copper Protein: Identification as Metallothionein	<i>Konrad Lerch, Gerald F. Johnson, Phyllis S. Grushoff, and Irmin Sternlieb</i>	108
Structural Characterization of the Cytoplasmic Pole of Band 3 from Bovine Erythrocyte Membranes	<i>Ryuichi Moriyama, Takashi Kitahara, Takuji Sasaki, and Shio Makino</i>	228
Fluorescence Studies on the Interaction between Two Cytochromes Extracted from the Yeast, <i>Hansenula anomala</i>	<i>Jihad Albani</i>	292

PROTEIN SYNTHESIS AND POST-TRANSLATIONAL PROCESSING

Purification and Characterization of the Mitochondrial Translocase from <i>Euglena gracilis</i>	<i>Susan L. Eberly and Linda L. Spremulli</i>	246
Biosynthesis of Prostatic Acid Phosphatase in a Normal Human Cell Line	<i>Robert L. Van Etten and Abdul Waheed</i>	264
Biosynthesis and Processing of Lysosomal Acid Phosphatase in Cultured Human Cells	<i>Abdul Waheed and Robert L. Van Etten</i>	274

PROTEOLYSIS AND PROTEIN TURNOVER

Purification and Properties of Rabbit Liver Cathepsin M and Cathepsin B	<i>Susan Erickson-Viitanen, Ettore Balestreri, Martin J. McDermott, B. L. Horecker, E. Melloni, and S. Pontremoli</i>	46
---	---	----

REGULATION OF METABOLISM AND OF ENZYME ACTION

The Effects of Cyclopropane Carboxylate on Hepatic Pyruvate Metabolism	<i>Mark E. Steinhelper and Merle S. Olson</i>	80
Thyroid Cell Responses to Thyrotropin and 12-O-Tetradecanoyl-phorbol-13-acetate: Translocation of Protein Kinase C and Phosphorylation of Thyroid Cell Polypeptide Substrates	<i>Akira Tanabe, Thor B. Nielsen, C. S. Sheela Rani, and James B. Field</i>	92
Modulation of the Activity of Rat Liver Acetylglutamate Synthase by pH and Arginine Concentration	<i>Edwin S. Kamemoto and Daniel E. Atkinson</i>	100
Catalases HPI and HPII in <i>Escherichia coli</i> are Induced Independently	<i>Peter C. Loewen, Jacek Switala, and Barbara L. Triggs-Raine</i>	144
Properties of an Acid Phosphatase from <i>Legionella micdadei</i> Which Blocks Superoxide Anion Production by Human Neutrophils	<i>Asish K. Saha, John N. Dowling, Karen L. LaMarco, Siddhartha Das, Alan T. Remaley, Nicholas Olomu, Michael T. Pope, and Robert H. Glew</i>	150
Purification and Properties of Aerobic and Anoxic Forms of Pyruvate Kinase from the Hepatopancreas of the Channelled Whelk, <i>Busycotypus canaliculatum</i>	<i>William C. Plaxton and Kenneth B. Storey</i>	195

NUMBER 2, DECEMBER 1985

COMMUNICATIONS

Mannose 6-Sulfate Is Present in the N-Linked Oligosaccharides of Lysosomal Enzymes of <i>Dictyostelium</i>	<i>Hudson H. Freeze</i>	690
Citrate Effects on the Ca ²⁺ -Loading Capacity of Isolated Rat Liver Mitochondria: Interaction of Citrate and ATP	<i>René Guidoux</i>	694
The Negative Cooperativity in Cytochrome c Oxidase Redox Reactions: The Electrostatic Effect	<i>Lev I. Krishtalik</i>	701

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Effects of t-Butyl Hydroperoxide on NADPH, Glutathione, and the Respiratory Burst of Rat Alveolar Macrophages	<i>Mark W. Sutherland, June Nelson, Gerald Harrison, and Henry Jay Forman</i>	325
---	---	-----

Pyridine Nucleotide Transhydrogenations in Yeast	
<i>Timothy C. Evans, Bruce Mackler, and Richard Grace</i>	492
Oxygen Dependence and Subcellular Partitioning of Hepatic Menadione-Mediated Oxygen Uptake. Studies with Isolated Hepatocytes, Mitochondria, and Mitochondria from Rat Liver in an Oxystat System	
<i>Herbert de Groot, Thomas Noll, and Helmut Sies</i>	556
Enzymatic Reduction of 5-Phenyl-4-pentenyl-hydroperoxide: Detection of Peroxidases and Identification of Peroxidase Reducing Substrates	
<i>Paul E. Weller, Christine M. Markey, and Lawrence J. Marnett</i>	633
Characterization of Electron Transfer and Proton Translocation Activities in Trypsin-Treated Bovine Heart Mitochondrial Cytochrome <i>c</i> Oxidase	
<i>Virgil A. DiBiase and Lawrence J. Prochaska</i>	668

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Kinetics of Inhibition and Hysteresis of Sheep Liver Cytoplasmic Aldehyde Dehydrogenase with Glyoxylic Acid: Further Evidence Relating to the Two-Site Model for Aldehyde Oxidation	
<i>Leslie W. Deady, Paul D. Buckley, Adrian F. Bennett, and Leonard F. Blackwell</i>	586

GLYCOPROTEINS AND GLYCOLIPIDS

Immunochemical Study on the Mannans of <i>Candida albicans</i> NIH A-207, NIH B-792, and J-1012 Strains Prepared by Fractional Precipitation with Cetyltrimethylammonium Bromide	
<i>Nobuyuki Shibata, Tsutomu Ichikawa, Minehiro Tojo, Michio Takahashi, Nami Ito, Yasuhito Okubo, and Shigeo Suzuki</i>	338
Major Carbohydrate Structures at Five Glycosylation Sites on Murine IgM Determined by High Resolution ¹ H-NMR Spectroscopy	
<i>Darrell R. Anderson, Paul H. Atkinson, and William J. Grimes</i>	605

LIPIDS AND PROSTAGLANDINS

Inhibition of the Functional Interaction between Fatty Acid Synthetase and Thioesterase II by Modification of a Single Cysteine Thiol on the Thioesterase	
<i>Andrzej Witkowski and Stuart Smith</i>	420
Interaction of PGB _x and Peroxides with Cytochrome <i>c</i> and Inhibition of Lipid Peroxidation	
<i>Shakunthala Narasimhulu and Eleanor M. Brown</i>	461
The Rate of Formation of Surface Membrane Ether Lipids in Ehrlich Ascites Tumor Cells: Kinetic Considerations	
<i>Samuel J. Friedberg, Michael Halpert, and George M. Barnwell</i>	504

MEMBRANES, CELL SURFACES, AND RECEPTORS

Glucocorticoid Receptor IB: Mediator of Anti-inflammatory and Teratogenic Functions of Both Glucocorticoids and Phenytoin	
<i>Masuyuki Katsumata, Chhanda Gupta, and Allen S. Goldman</i>	385
Comparison of the Rat Microsomal Mg-ATPase of Various Tissues	
<i>Troy J. Beeler, Theresa Wang, Kenneth Gable, and Shirley Lee</i>	644
The Regulation of Adenylate Cyclase Activity in Turkey Erythrocyte Membranes by Forskolin	
<i>Stephen A. Morris and John P. Bilezikian</i>	678

NEUROCHEMISTRY

- Effects of Carboxylmethylation by a Purified *Torpedo californica* Methylase on the Functional Properties of the Acetylcholine Receptor in Reconstituted Membranes
Amy S. Yee and Mark G. McNamee 349

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- Induction of Specific Cytochrome P-450 Isozymes by Methylene dioxyphenyl Compounds and Antagonism by 3-Methylcholanthrene
Heather N. Yeowell, Patricia Linko, Ernest Hodgson, and Joyce A. Goldstein 408
- Preparation and Characterization of Polyclonal and Monoclonal Antibodies against Human Aromatase Cytochrome P-450 (P-450_{AROM}), and Their Use in Its Purification
Carole R. Mendelson, Elizabeth E. Wright, Claudia T. Evans, John C. Porter, and Evan R. Simpson 480

PHYSICAL BIOCHEMISTRY

- Isolation and Crystallization of λ Exonuclease
Jan van Oostrum, Janice L. White, and Roger M. Burnett 332
- Preliminary X-Ray Crystallographic and Raman Studies on Gramicidin S $\cdot$ 2HCl
Suk Bong Hong, Sang Kyu Kim, Myung Soo Kim, and Se Won Suh 563
- Effect of Thermodynamic Nonideality on the Subcellular Distribution of Enzymes: Adsorption of Aldolase to Muscle Myofibrils
Simon J. Harris and Donald J. Winzor 598

PLANT BIOCHEMISTRY AND PHOTOSYNTHESIS

- Isolation and Characterization of Two Cyanogenic β -Glucosidases from Flax Seeds
Teresa W.-M. Fan and Eric E. Conn 361
- Chorismate Mutase Isoenzymes from *Sorghum bicolor*: Purification and Properties
Bijay K. Singh, James A. Connelly, and Eric E. Conn 374
- Elicitor-Induced Phytoalexin Synthesis in Soybean Cells: Changes in the Activity of Chalcone Synthase mRNA and the Total Population of Translatable mRNA
Dorit Grab, Rosemarie Loyal, and Jürgen Ebel 523
- Purification and Characterization of a Basic Lysophospholipase in Germinating Barley
Yuzo Fujikura and Derek Baisted 570
- Plastocyanin Stimulation of Whole Chain and Photosystem I Electron Transport in Inside-Out Thylakoid Vesicles
Emmanuel Atta-Asafo-Adjei and Richard A. Dilley 660

PROTEIN STRUCTURE AND FUNCTION

- Enzyme Elements Involved in the Interconversion of L-Carbamylaspartate and L-Dihydroorotate by Dihydroorotase from *Clostridium oroticum*
Donald W. Pettigrew, Bharati J. Mehta, Robert R. Bidigare, Rita Roy Choudhury, Julie E. Scheffler, and Eugene G. Sander 447
- Discrepancies among Published Amino Acid Sequences of Soybean Leghemoglobins: Experimental Evidence against Cultivar Differences as the Sources of the Discrepancies
William H. Fuchsman 454
- Purification and Characterization of the Extracellular β -Glucosidase Produced by *Candida wickerhamii*
Shelby N. Freer 515

Chondronection: Physical and Chemical Properties	
<i>Hugh H. Varner, Heinz Furthmayr, Bo Nilsson, Peter P. Fietzek, James C. Osborne, Jr., Silvana De Luca, George R. Martin, and A. Tyl Hewitt</i>	579
<i>In Vivo</i> Cleavage of Dentin Phosphophoryn following β Elimination of Its Phosphoserine Residues	
<i>Ryuichi Fujisawa, Yoshinori Kuboki, and Satoshi Sasaki</i>	619

PROTEIN SYNTHESIS AND POST-TRANSLATIONAL PROCESSING

Cell Cycle Variations in ADP-Ribosylation of HeLa Nuclear Proteins	
<i>Kenneth W. Adolph</i>	427

PROTEOLYSIS AND PROTEIN TURNOVER

The Effect of Mixed-Function Oxidation of Enzymes on Their Susceptibility to Degradation by a Nonlysosomal Cysteine Proteinase	<i>A. Jennifer Rivett</i>	624
--	---------------------------	-----

REGULATION OF METABOLISM AND OF ENZYME ACTION

Enzymatic Properties of Dimethylglycine Dehydrogenase and Sarcosine Dehydrogenase from Rat Liver	<i>David H. Porter, Robert J. Cook, and Conrad Wagner</i>	396
Regulation of Adenylate Cyclase by Adenosine and Other Agonists in Rat Myocardial Sarcolemma	<i>Madhu B. Anand-Srivastava</i>	439
Interconvertible Molecular-Weight Forms of the Bifunctional Chorismate Mutase-Prephenate Dehydratase from <i>Acinetobacter calcoaceticus</i>	<i>Alan Berry, Graham S. Byng, and Roy A. Jensen</i>	470
Identification, Purification, and Partial Characterization of Plasma Protein Kinases	<i>Thomas M. Chiang and Andrew H. Kang</i>	530
Physiological Covalent Regulation of Rat Liver Branched-Chain α -Ketoacid Dehydrogenase	<i>Robert A. Harris, Steven M. Powell, Ralph Paxton, Sarah E. Gillim, and Hidetoshi Nagae</i>	542
Synthetic Peptide Substrates for Mammalian Pyruvate Dehydrogenase Kinase and Pyruvate Dehydrogenase Phosphatase	<i>Thomas R. Mullinax, Larry R. Stepp, James R. Brown, and Lester J. Reed</i>	655

ERRATUM

Volume 238, Number 2 (1985): Adalberto Vieyra, José R. Meyer-Fernandes, and Octávio B. H. Gama, "Phosphorolysis of Acetyl Phosphate by Orthophosphate with Energy Conservation in the Phosphoanhydride Linkage of Pyrophosphate," pp. 574-583	703
AUTHOR INDEX FOR VOLUME 243	704
CUMULATIVE AUTHOR INDEX FOR VOLUMES 236-243	706
CUMULATIVE SUBJECT INDEX FOR VOLUMES 236-243	718

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1980. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255–260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246–409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
